Wilson

INDEX TO VOLUME XVII

GENERAL ALPHABETICAL INDEX

Entries from the Synopsis of Periodical Literature are indicated by S. (Synopsis); from the Analysis of Current Electrochemical, Chemical and Metallurgical United States Patents by P. (Patents).

A

Abrasives. Aluminous. Kalmus. (P.).. 439
——Conditions in industry..... 193
——From nephelin syenite. Kalmus. (P.). 353
——Saunders. (P.)..... 607
Acetanilid. Apparatus for acetylation of aniline oil 306
Acetanilid. Nitration of apparatus..... 306
Acetic acid. Action on aluminium. Williams & Seligman. (S.).... 38
Acetone. By-product of soda pulp industry 157
Acetone. Explosibility of acetone-air mixtures. Wheeler. (S.)..... 240
Acetone. From carbide. (S.)..... 351
Acetylation apparatus. Pope..... 303
Acids. Organic. Use in ore flotation.... 544
Addition agents in flotation. Thornberry. 709
Aeroplanes. Steel for. Hatfield. (S.).. 497
Air dust. Quantitative determination. Hill (S.) 190
Alcohol. Industrial companies dividends. 202
——Manufacture. Matter. (P.)..... 662
——Methyl. From soda pulp industry... 157
——Motor fuel in Australia..... 668
Alizarine 450
Alkalies. Use in ore flotation..... 543

ALLOYS:
——Aluminium. Morris. (P.)..... 140
——Bearing metal. Sandell. (P.)..... 41
——Brass rolling mill..... 382
——Iron-chromium. Marsh. (P.)..... 242
——Non-ferrous electric furnace melting. Miller 537
——Pure. Yensen..... 461
——Stellite 381, 387
——Suggestions on metallography of A. S. T. M. 59

ALUMINIUM:
——Action of acetic acid on. Williams & Seligman. (S.)..... 38
——Alloys. Morris. (P.)..... 140
——Production 1892-1916..... 291
——Recent uses. Shull..... 381
——Recovery from clay. Weaver. (P.) 439
——Situation. Richards..... 269
——Soldering. Litot. (P.)..... 40
——Welding process 611
Aluminium chloride. Action on aromatic hydrocarbons. Moore & Egloff.. 61
——Action on solvent naphtha. Moore & Egloff 128
——Treatment of oils. McAfee. (P.)... 557
Aluminium nitride. Serpek process..... 531
Aluminium salts. U. S. production..... 631
Aluminous abrasives. Kalmus. (P.).... 439
Alums. Additions agents in flotation. Thornberry 712
Alunite. Potash from..... 433

AMERICAN CHEMICAL SOCIETY:
——Boston meeting. Announcement.... 112
—— Report 283, 384
——Chicago Section. Reminiscences..... 4
——New York Section: Foodstuffs meeting 576

AMERICAN ELECTROCHEMICAL SOCIETY:
——Pittsburgh meeting. Announcement...110
—— Program 208
—— Report 458
——Southern meeting. Outline..... 516
American Fire Brick Co. new magnesite plant 354
American Foundrymen's Association:
——Boston meeting, Report..... 380
American Institute of Chemical Engineers:
——Buffalo meeting, Report..... 5
——St. Louis meeting..... 684
American Institute of Metals:
——Boston meeting, Program..... 159
——Boston meeting, Report..... 380
American Institute of Mining Engineers:
——New York Section. Manganese situation 110
——New York Section, Meeting..... 626
——St. Louis meeting, Announcement.... 57
——St. Louis meeting, Report.....455, 519
American Iron & Steel Institute, Cincinnati meeting 524, 578
American Paper & Pulp Association—Holyoke meeting of Technical Section 278
American Society for Testing Materials—Atlantic City meeting..... 11
——Atlantic City meeting, Report..... 59
American Smelting & Refining Co. Smoke investigations 682
American Steel and Wire Co. Training course 408

AMMONIA:
——Oxidation to nitric acid..... 345
——Oxidation. Frank-Caro and Ostwald-Barton process 263
——Oxidation of, to nitric acid..... 533
——Oxidation of Landis. (P.)..... 716
——Synthetic. Bibliography 328
——Synthetic process 531
——Synthesis. Maxted 345
——Synthetic plant, General Chemical Co.'s process 261
Ammonium molybdate 55
Ammonium sulphate, World's supply..... 527
Ammunition. Investigation at Washington of defective material..... 375
Ammunition. Shrapnel bullets 381
Anaconda Copper Mining Co. Strike settlement 370

ANALYSIS: (See also various elements and compounds).
——Antimony in zinc electrolytes. Bradley 275
——Benzol plant methods. Sperr..... 548
——Benzol recovery operations. Sperr.. 586
——Chromium in steel. Hamner..... 206
——Correct sampling. Kershaw..... 108
——Electro. Jones..... 466
——Ferrosilicon. Lowe..... 597
——Phosphorus in high-speed steel. Kraus. 681
——Phosphorus in high-speed steel. Sheffield 625
——Vanadium in steel. Hamner..... 206
Aniline oil. Production. Schmidt. (P.). 661
Annealing. Large projectiles. Pilnacek. 245
Anodes. Nickel. Welding..... 140
Antimony. Electrolytic 383
——From copper refineries..... 171
——In zinc electrolytes. Bradley..... 275
——Metallurgy of. Li..... 382
Art-science divorce scandal..... 2
Asphalt. British nomenclature..... 78
Asphalt. Colloidal Theory. Richardson. 650
Austria-Hungary. Chemical industries... 441
Autoclaves. Design of Pope..... 704

B

Ball mill. Marcy..... 326
Ball mills. At St. Joe Lead Co..... 320
Banker. Chemistry and. Little and O'Reilly 449, 476
Batteries. Storage. Effect of lithium hydrate. Turnock..... 467
Bauxite. Market for 637
Bearing metal. Sandell. (P.)..... 41
Beet sugar. Potash from waste liquors. Litowski 17
Belt conveyor. Portable..... 665
Benzene. (See also Benzol.) Action of aluminium chloride. Moore and Egloff 61
——Effect of pressure on gas oil. Egloff. 286
——Scrubbing carburetted water gas. Moore and Egloff..... 297
Benzol. Laboratory methods for plant operation. Sperr.....549, 588, 642
Birkeland, K..... 145
Bismuth. Uses 169
Bitumens. British standard nomenclature. 78
Bitumens. Colloidal. Richardson..... 650
Black Prince Tungsten mill. Fischer.... 73
Blende. For sulphuric acid making. Ridge 215
Blowing engines. Comparison..... 440
Bohemian Girl Mill..... 521
Boilers. Setting and resetting..... 123
——Waste heat. Pratt..... 383
——Tubes. Cleaning 123
Bonne Terre mill..... 319

BOOK REVIEWS:
——Camp. Commercial Sampling and Analysis of Coal, Coke and By-Products 247
——Crowell and Murray. The Iron Ores of Lake Superior..... 247
——Hausbrand, Evaporating, Condensing and Cooling Apparatus..... 612
——Heath, Analysis of Copper..... 612
——Lamb. A Laboratory Manual of General Chemistry 246
——Moldenke, The Principles of Iron Founding 612
——Murray and Crowell. The Iron Ores of Lake Superior..... 247
——Roush. Mineral Industry for 1916.. 669
——Running. Empirical Formulas..... 612
——Scott. The Journal of the Institute of Metals 247
——Skinner. Mining Manual and Mining Year Book 44
——Thomas. Chemical Patents and Allied Problems 441
Braden Copper Co. Annual Report for 1916 372
Brass. Cartridge. Browndson. (S.).... 434
——Corrosion of. Rawdon 382
——Melting in Electric Furnace. Clamer 380
——Melting in Electric Furnace. Miller.. 380
——Melting. Baily Furnace 461
Brass Pipe. Dezincification. Story..... 653
Brass Rolling Mill Alloys 382
Brick. Refractory. Testing..... 184
——Silica. Manufacture. Nesbitt..... 181
Brine. Evaporation of..... 696
Briquettes. Binding Material. Mathesius. (P.) 193
Briquetting Non-Ferrous Scrap. Stillman. 381
British Munitions Commission Discusses Labor Question 574
Bromine Production in 1916 152
Brown & Head Zinc Co. New Mill Planned 370
Bucher process of nitrogen fixation.... 262
Bunker Hill & Sullivan Litigation..... 453
Bureau of Mines. Advisory Chemical Board 627
——Annual report for 1916..... 627
——Illinois station 660
——New stations 415
Butte & Superior Flotation suit..... 277

C

Calcium chloride. Production in 1916.. 152
Calcium cyanamide. Reid. (P.)..... 607
Calcium silicates as fertilizers. Cowles, (S.) 664
Calcium sulphate. Use in flotation..... 545
Calorimeters. Emerson. Adiabatic jacket. 357
Calorized iron. Kowalke..... 461
Camp Bird Limited. Report..... 56
Canada. Mineral production in 1916.... 276
Carbide. Synthetic rubber from. (S.).... 350
Carbohydrates as deoxidizers. (P.)..... 438
Carbon electrodes. New factory..... 96
Carborundum. As a carbon and silicon furnishing agent. Johnson. (P.) 352
Carburetted water gas. Scrubbing. Moore and Egloff 297
Cars. Dump. Removable body..... 358
Cars. Industrial. New types..... 194
Cascade flotation process. Seale and Shellshear. (S.)..... 555
Case-hardening material. Blaich. (P.).. 607
Catalysis. Actinic rays. Keyes. 662
Catalysis Bancroft..... 469
Caustic Soda. Electrolytic purification. Kipper. (P.)..... 90
——Use in ore flotation 543
Causticizing soda liquors. Griffin..... 599
Celluloid substitute. Dreyfus..... 661
Cellulose. Acetyl. (P.)..... 661
——Development of industry. Cross. (S.) 237
——Dry distillation. Hochstetter. (P.) 661
——New compounds. (P.)..... 662
Cement floors. Protective treatments. Anderson. 667
Cement mills. Waste heat. Baylor..... 9
Cement. Potash from. Meade..... 213

Cerium. Production. Thompson..... 213
Cerium chloride. Electrolysis. Thompson. 213
Chalcopyrite. Flotation of. Coghill..... 546
Charpy impact tests..... 299, 399
Chars. Coates..... 286
Chemicals. Committee on. Work of Nich ols 284
——Increased exports 481
——Packing. Laury 407
——Used in ore flotation. Ralston..... 541
Chemical engineer. Work of. Thompson. 391
Chemical engineering. Renovating a sulphide mill. Moore. 117
Chemical industries. French. During war 715
Chemical industries. Japan. (S.)..... 137
Chemical Industry Club, (London.) First meeting. (S.)..... 37
Chemist and the banker..... 449, 476
Chemists in the making 4
Chemistry Committee of National Research Council 285
Chemistry. More preparation needed in high schools. Palmer. 7
China. Salt production. Richardson..225, 313
Chino Copper Co. 1916 annual report.. 371
Chloridizing. Flotation concentrates..... 453
Chlorine in warfare..... 465
Chrome-nickel steels. Physico-chemical properties. French 473
Chromium. Iron-chromium alloys. Marsh. (P.) 242
Clay. Aluminium and silicon from. Weaver. (P.)..... 439
——Removing suspended matter. Schwerin. (P.) 242
Clenzall washing machine 194

COAL:
——Deterioration in heating value. Note. 536
——Low grade. Coking. Winmill..... 493
——Low grade. Use of. Coffin..... 495
——Power from 625
——Production 1892-1916..... 291
——1916 production. 160
——Production in 1917. 541
——Pulverized. For melting cast iron. .. 383
——Recovery of sulphur. Pogue. 584
——Storage, weathering and spontaneous combustion. 481
——Switzerland situation. 430
——Warning against hoarding..... 593
Coal gas. Gasoline substitute. 599
——For autos. 337
——Nitric acid from. (S.)..... 350
Coal-tar products. (See also dyestuffs and intermediates.)
——Tariff Commission Census..... 573
Cobalt. Uses..... 169
Cobalt ores. Flotation practice. Callow. (S.) 87

COKE:
——By-product oven situation. 273
——By-product plant. Laboratory methods. Speer.....548, 587, 642
——By-product. Kurahashi. Correction. 109
——Constitution and heat value. 234
——Design of modern coking plants. Myers. 232
——Low temperature coking. Winmill. (S.) 493
Colloids. Relation to asphalt industry. Richardson. 650
Color. Fundamental hue scale. 94
Color. Physical basis. Luckiesh. (S.).. 351
Color. Physical basis. Luckiesh..... 631
Color Trade Journal. 233
Colorado. Smelter investigation. 276
Colorado Fuel & Iron Co. 620
Colorado Mill Operators Association. ... 55
Colorado School of Mines. Disintegration of. 568
Colorado Sulphur Co. 523
Combustion. Fractional. Bancroft. ... 470
Commerce Mining & Royalty Co., Jay Bird Mill. 571

CONCENTRATION:
——Butchart and Wilfley riffling..... 322
——Joplin practice. 520
——Leadwood mills. 326
——Milling practice of St. Joseph Lead Co. 317
——Ore treatment at Falcon mine, South Africa. Adam. (S.) 89
——Rivermines mill. 326
Consolidated Mining & Smelting Co. Recent operations. (S.) 37
Conveyor. Portable belt. 665

COPPER:
——Economical.
—— Government fixes price..... 371
—— Labor troubles curtail production. 157
—— Output at low ebb..... 277
—— Production 1892-1916..... 291
—— Settlement of Montana strikes.. 370
—— Concentration flotation of Mt. Lyell. (S.) 663
—— Falcon Mine, South Africa. Adam. (S.)..... 89
—— Flotation of chalcopyrite. Coghill. 546
—— Hydrometallurgy. Bradley. (P.) 240
—— Greenway. (P.) 40
—— Leaching with chloride solution. Schmidt. (P.) 438
—— Precipitation by sulphur dioxide. Weidlein. 387, 499

COPPER—*Continued*:
——Refining:
—— By-products. Addicks..... 169
—— Electrolytic precipitation. Westby. (P.) 438
—— Furnace refining. 579
—— Purification of electrolyte. Pope. (P.) 438
——Smelting:
—— Smelting. Electric furnace. Dewar. (S.)..... 239
—— Recovery of values from slags. Herreshoff. (P.) 354
—— Miscellaneous. Spectroscopic determintaion of lead. Hill..... 659
—— Copper-zinc alloys. Electric furnace melting 538
—— Castings for electrical purposes. Corse 466
—— Corrosion by acids. Watts..... 468
—— Electrolytic recovery. From pickling solutions. Jones..... 466
Copper sulphate. Use in ore flotation.... 543
Cooling electrodes. Styri..... 233
Cooling system. Pope. 306
Corrosion. Fence wire. Storey. 467
——Lack of measure of. Carnahan. 60
——Metals by acids. Watts. 468
Cotton seed industry. Vakil. (S.) 495
Cottrell precipitation process..... 683
Council. Engineering. 280
Council of National Defense. Organization. 58
Council of National Defense. Committee on Chemicals. Work of. 284
Council of National Defense. Reorganized 684
Crucibles. Situation in American made goods. 380
Cutler-Hammer magnetic pulleys..... 42
Cutting oils. Copeland. 25
Cyanamid process. 263
Cyanide process. (See Gold and Silver, Zinc, etc.)
Cyanides. Apparatus for iron-coke-soda ash process. McKee. (P.)..... 606

D

Decolorizing agents. Coates..... 286
Detinning. History of. 187
Dezincification of brass pipe. Story.... 653
Dorr causticizing system. Griffin. 599
Drying. Saturated brine..... 697
Dust collection in factories. Clark. (S.) 38
Dust. Quantitive determination. Hill. (S.) 190
Dwight-Lloyd sintering process. 113
Dwight sintering machines. (P.)..... 139

DYESTUFFS:
——Alizarine. 450
——American industry. Stone. 266
——Baekeland 395
——Exports July 1917. 588
——Investigation of Tariff Commission. 628
——Nitrating kettles. Pope..... 303
——Notes on fusion apparatus. Pope... 704
——Output of American factories. ... 211
——Permanent American industry. McKerrow. 595
——Physical basis of color technology. Luckiesh. (S.)..... 351
——Physical basis of color. Luckiesh... 631
——Production to be determined by Tariff Commission. 573
——Recent patents. 606
——Solidifying points of naphthalene. Heyl 681
——Sulphonating kettles. Pope..... 153
——Swiss situation. 430
——Tariff. Hesse. 392

E

Eastman Kodak Co. Fundamental Color scale. 94
Education. Engineerings in training. Hill 700
Ekenberg process of carbonization. Testrup. (P.) 242
Electric Furnace Co., of America. 93
Electric machinery. Low voltage hazards. Lauffer. 489
Electroanalysis apparatus. Jones. 466
Electrochemical industries. Italian. (S.).. 603
——Niagara power situation. Tone..... 257
——Substation problem. 458
Electrochemistry. Recent developments. Hooker. 270
Electrodes. Carbon. New factory..... 96
Electrodes. Cooling of Styri..... 233
Electrolysis of organic compounds. Piguet. (P.) 42
Electrometallurgy in Northwest. 453
Electro-osmosis. Schwerin. (P.)..... 242, 353
Engineering Council. Organization. .. 57, 280
Engine. Internal combustion. 52
Engel. René. 285
Engineers in training. Hill..... 698
Espionage Act. 373
Ethyl chloride. Lacy. (P.)..... 661
Evaporation. Various problems. Moore. 117
Evaporation. Plant of Nebraska potash works 696
Exemption of Medical Students. 374
Explosives. Acetone-air mixtures. Wheeler. (S.) 240
——British Inspector's report. (S.)..... 496
——Regulation of 577
Exports. Regulation of..... 373

EXPOSITION. THIRD CHEMICAL:
——Announcements. 110, 160
——Chemical. List of exhibitors..... 210
——Criticism of. Roush. 206
——Editorial. 367
——Motion picture program. 327
——Program. 279
——Reply to criticism. 274

F

Faraday Society. Symposium on pyrometers 685
Feldspar. Potash from. Glaeser. (P.).. 557
Feldspar. Production in 1916. 152
Ferromanganese. An opportunity for metallurgists. 110
——Low carbon. Humbert. (P.)..... 140
——Manufacture. Bibliography. Buck.. 638
——Manufacture in Sweden. Harden.... 701
——Use in foundry. 19
Ferromolybdenum. Produced in Canada. 55
Ferrophosphorus. Gray. (P.)..... 40
Ferrosilicon. Lowe. 597
——Production in blast furnace. Johnson. (P.) 352
——Use in foundry. 19
Fertilizer. Calcium silicate. Cowles. (S.) 664
Filtercloths. Washing machine. 194
Filtration. Intermittent and continuous. Griffin. 599
Filtration. Principles of. Sperry. 161
Firebrick. Expansion and contraction in reducing atmospheres. Mellor. (S.) 138
Firebrick. Hot and cold sizes. Mellor (S.) 138
Floors. Cement. Protective treatments. Anderson. 667

FLOTATION:
——Canadian wood oils for. Gilmore. (S.) 663
——Cascade system. Seale & Shellshear. (S.) 555
——Chalcopyrite. Coghill. 546
——Chemicals used. Ralston. 541
——Chloridizing concentrates at Buffalo Mills. 453
——Cobalt ores. 277
——Combined with cyanidation. Friberger. (P.) 40
——Development marred by litigation... 56
——Effect of addition agents. Thornberry 709
——Groch process. 502
——In cyanide solution. Tippett. (P.).. 498
——Minerals separation machine at St. Joe Lead Co. 325
——Minerals Separation vs. Butte & Superior. 277
——Mt. Lyell Company's plant. (S.)..... 663
——Oxidized ores. Bacon. (P.)..... 500
——Present practice on cobalt ores. Callow. (S.) 87
——Suits. Choate. 452
——Sulphidizing oxidized ores. Van Arsdale. (P.) 500
——Theory of froth. 387
Fluorspar. Production in 1916. 281
Foss. Fedor M. Russian Commission... 281
Foundry. Metallurgical processes. Outerbridge 19
Fractional combustion. Bancroft..... 470
France. Chemical industries during war. 715
Freeport sulphur mines. 141
Fremont impact test. 299
Fuel oil situation serious in West. 158
Fuel. Natural gas in South. Smith.... 682
Fuel. Use of low grade. Coffin. (S.).... 495
Fuels. Use of low grade. Kershaw. 234

FURNACE: BLAST,
—Blowing equipment. Steam turbine vs. Reciprocating Engine. 440
——Gas cleaning machine. Ruddiman. .. 608
——Production of ferrosilicon. Johnson. (P.) 352
——Phosphoric acid. Waggaman. (P.).. 607
——Super-heating of slags. 410
Furnace. Boiler. Use of coke. 234

FURNACE: ELECTRIC,
——General:
—— Brass melting in electric furnace. Miller. 380
—— Development in non-ferrous metallurgy. Miller..... 537
—— Electric pig iron in war times.. 459
—— Ferromanganese manufacture in Sweden. Harden 701
—— Heat treating, and melting. Baily 91
—— Meter accuracy on arc furnace loads 224
—— Refractory magnesia. Gosrow.. 415
—— Review of situation. FitzGerald 268
—— Smelting copper ores. Dewar. (S.) 239
—— Smelting iron ores in Northern Sweden. Leffler. (S.)..... 350

FURNACE, ELECTRIC—*Continued:*
——Various Designs:
—— Ajax-Wyatt for brass melting.... 380
—— Automatic heat treating. Baily. (P.) 193
—— Baily 91
—— Baily furnace for brass melting.. 461
—— Baily metal melting..... 538
—— Birkeland-Eyde 529
—— Bradley-Lovejoy Nitrogen fixation 528
—— Conley furnace 537
—— Gillett brass melting..... 381
—— Gillett indirect arc..... 537
—— Granular carbon. Tucker..... 10
—— Greaves-Etchells. Scott..... 243
—— Hering pinch effect..... 537
—— Hoskins for melting non-ferrous metals 539
—— Nathusius type 703
—— Northrup-Ajax induction..... 501
—— Northrup induction 537
—— Norwegian iron industry..... 460
—— Rennerfelt. Non-ferrous metals. 540
—— Roechling furnace 703
—— Schönherr 530
—— Snyder. Non-ferrous metals.... 540
—— Steel heating. Thornton..... 460
—— Thomson-FitzGerald. 537
Furnace: Gas. Welding. Richardson.... 355
Furnace: Zinc smelting. Various types. Johnson. 300
Fusion apparatus. Notes on. Pope..... 704

G

Galvanometers. Tripod stand. 96
Gambler. 302

GASES:
——Carburetted water. Scrubbing. Moore and Egloff. 297
——Coal. For autos. 337
——Electrical treatment. Davidson. (P.) 140
——Fractional combustion. Bancroft... 470
——High pressure burning. 625
——Industry in England. (S.)..... 604
——Laboratory methods for benzol recovery plant operation. Sperr. 458, 588, 642
——Natural gas in South. Smith..... 682
——Welding furnaces. Richardson. 355
Gas cleaning machine. Blast furnace. Ruddiman. 608
Gas oil. Effect of pressure on benzene and toluene formation. 286

GASOLINE:
——Coal gas as substitute..... 598
——Coal gas for autos. 337
——Electrochemical. Cherry (P.) 352
——Electrochemical production. Cherry. 465
——Per cent produced by cracking in 1916 and 1917. Egloff..... 680
——Specifications for Government use... 211
——Sulphuric acid treatment. Egloff.... 156
Gelatin. Thickening. (P.)..... 661
General Bakelite Co. Statement. 157
General Chemical Co., nitric acid process. 255, 261
Germany. Recent developments. (S.)..... 556
Glass. American optical glass. Day. 283
——Optical. Made in America..... 368
——Optical glass problem..... 677
——Physical basis of color. Luckiesh 351, 637
——Quartz-glass machines. Frost. (P.).. 192
Glasses. Industrial. 358
Glassware. Temperature calibration. Wissler. 453
Glue and gelatin in Japan. 137
Glue. Machinery employed in manufacture. Lowenstein. 6

GOLD AND SILVER: (See also, Silver.)
——Automatically controlling continuous agitation. Bucher. (P.) 499
——Consolidated Mining & Smelting Co. (S.) 37
——Copper refinery production. 170
——Corrosion by acids. 468
——Cyanide process. Efficiency of zinc precipitation. Sherwood. (S.) .. 437
——Cyanide Process. Electrolytic. Tainton. (P.) 438
——Falcon mine, South Africa. Adam. (S.) 89
——Flotation and cyanidation combined. Friberger. (P.) 40
——Flotation in cyanide solution. Tippet. (P.) 498
——Flotation of cobalt ores. Callow. (S.) 87
——Flotation tests on Transvaal gold ore. Wartenweiler. (S.) 88
——Gold production. 1892-1916. 291
——Gold recovery from chalcopyrite. 547
——Gold-tungsten ore in Idaho. (S.)... 436
——Ores containing manganese dioxide. Caron. (P.) 498
——Precipitation and smelting at Great Fingall Mines. (S.) 662
——Production and prices. 759
——Refining anode mud. Addicks. 173
——Refractory gold ore treatment. Niemann. (P.) 41
——United Eastern Mill. Wartenweiler. 656
Goldschmidt Detinning Co. 189
Granby Consolidated Mining Smelting & Power Co., Report. 572
Granulator. Tests on Allis-Chalmers. .. 321
Great Fingall Mines. (S.)..... 662
Great Western Electrochemical Co. Report. 620
Great Western Power Co. Hearing. 208
Greaves-Etchells electric furnace. Scott. 243
Greensand. Potash from. Charlton..... 286
Grignard. Victor. 283
——Made honorary member of Chemists' Club. 517
Groch Flotation process. 502
Guayule rubber. Ephraim. 54

H

Hancock jig. 456
Heat insulation tests. (S.) 605
Heating system. Oil..... 717
Hord Alkali Products Co..... 698
Humidity and dew point control. Carrier patent. 202
Huntington-Heberlein pot roasting. 113
Hydrometallurgy. Opportunities for. 622

I

Impact tests. Charpy. 397
Impact tests. Howe..... 299
Impervite pyrometer tubes. 611
Inspiration Copper Co. Annual report for 1916. 372
Insulation. Heat. Tests of materials. (S.) 605
Intermediates. (See also Dyestuffs.) Cooling system. Pope..... 306
——Nitrating Kettles. Pope. 303
——Notes on fusion apparatus. Pope.... 704
——Sulphonating Kettles. Pope. 153
Intermountain tungsten mill. 74

IRON AND STEEL:
——General:
—— American Institute of Metals and American Foundrymen's Association. 380
—— American steel industry. Résumé 259
